👤 PROFILE

(n.) /hee-maan-shoo - shek-haar./ defn. A male of Eastern Indian descent, who once happened to click on 'View Source' of a webpage with genuine curiosity, and now is a Software Developer.

👥 EMPLOYMENT HISTORY

Software Engineer at **TestSigma, Bengaluru**
Aug 2024 - Present

- Chrome Extension:
  - Implemented **custom CSS Path generator library** to tackle recording **Shadow DOM and iFrame elements**.
  - Led and contributed in improving performance of TestSigma recorder.

Senior Software Engineer at **Spydra, Bengaluru**
March 2023 - August 2024

- **Authentication System Integration:**
  - Implemented Auth0 for secure frontend and backend authentication.
  - Configured authentication flows in Auth0 to enhance application security.
- **Frontend Feature Development:**
  - Led development of a user-friendly dashboard. Implemented channels functionality for efficient communication.
  - Developed custom user front (landing page) creation for our OpenRWA product.
  - Developed custom **WASM to scan a barcode** in web application.
- **Blog:** Wrote **custom theme for wordpress** based blog.
- **Backend:**
  - **Data Transformer :** Fetches data from .xlsx file, converts to readable format over which logics can be applied and then creates a desired object to create a blockChain asset.
- **Contributions to Spydra's Client Side:**
  - Created frontend projects from scratch in Next.js and React Native.
  - Created a **statically dynamic multilingual User front** web-app with animations **(GSAP)**

Senior Software Engineer at **PiggyRide, Bengaluru**
April 2022 - February 2023

- **Feature:**
  - Developed frontend and backend for user and admin interfaces for the **QUIZ product.**
  - Implemented game feature using open-source **iframe** for higher user engagement.
- **Auto Notification System:**
  - Implemented backend-driven auto-notification system for timely updates for billing and classes.

Software Engineer at **PiggyRide, Bengaluru**
October 2021 - March 2022

- **Zoom API Integration:**
  - Integrated Zoom APIs for smooth hosting of live classes.
- **Mobile-Web UI Enhancement:**
  - Optimized UI with a custom bottom bar for a more app-like appearance.
